GitHub:AmanSri — [LeetCode:AmanSri](#)

Education

NIMS University , Jaipur

B.Tech in Computer Science 3rd

Year Student (2023 – Present) : 4th Semester SGPA: 9.84

Relevant coursework: Machine Learning, Deep Learning, Data Structures and Algorithms (DSA), DBMS, Web Development

CGPA: 9.1+

Skills

Programming Languages: Proficient in Python and C++ for building applications, solving algorithmic problems. Familiar with SQL for querying and managing databases.

Web Development: Hands-on experience with the HTML, CSS, JAVASCRIPT in making UI's, also experienced in using ReactJS for UI development.

Machine Learning & AI: Understanding of Supervised and Unsupervised Learning techniques, including classification, regression, and clustering. Experience with Neural Networks, basic Deep Learning, and applying Natural Language Processing (NLP) using Python libraries.

Databases: Experience in designing schemas, performing CRUD operations, and optimizing queries in both relational (MySQL) and non-relational (MongoDB) databases.

Data Structures & Algorithms (DSA): Strong grasp of core concepts including arrays, linked lists, trees, graphs, sorting, and dynamic programming. Regularly solve problems on [LeetCode](#) to strengthen algorithmic thinking. Version Control: Proficient with Git for source control and GitHub for collaboration and code management.

Experience with branching, pull requests, and repository maintenance. Proficient in tools like Microsoft Power BI, MS Excel.

Hands on experience in Linux commands and deployment using Nginx and Docker(DevOps).

Projects

Ed-Tech Platform (Frontend) — HTML, Tailwind CSS, Javascript

Designed a responsive and user-friendly UI using HTML ,Tailwind CSS, Javascript, ensuring compatibility across devices.Developed the front-end of Notepedix, an EdTech platform designed to provide students with free, organized notes and learning resources across various academic subjects. Live: [Ed-Tech Platform](#)

AI WhatsApp Bot using LangChain, Gemini & Wikipedia — Python, Gemini API, Streamlit and LangChain

Built a smart chatbot integrated with WhatsApp via Twilio. Used LangChain with Gemini for AI-based responses and Wikipedia tool for real-time query handling. [GitHub: Chatbot](#)

HitAyu — Ayurveda Wellness Web Application

Developed a responsive full-stack wellness platform using HTML, CSS, JavaScript/ReactJS.

Integrated APIs to enable dynamic content delivery and chatbot-based user interaction. [Live:HitAyu](#)

Movie Recommendation System using Machine Learning

Built a movie recommendation system using Python & Scikit-learn, implementing content-based filtering and similarity algorithms.

Performed data preprocessing and deployed a simple UI using Streamlit/Flask.

Achievements

Problem-Solving – Solved 100+ problems across platforms like Leetcode, CodingNinjas and Codechef to strengthen algorithmic skills.

Tutodude 48 Hour Hackathon 2025

Developed a Front end working prototype for the given problem statement within 48 hours

Smart India Hackathon (SIH)'25 -

Developed solutions for real-world problems. Got selected in SIH for two real world problems with Software Solutions

University Ideathons - Presented an idea on Sustainable irrigation System and management using AI powered rover

Certifications

Python Completion
Certificate

Front End Development --IIIT ALLAHABAD X
ENGINEER COR

1

MYSQL Certification from OneRoad
